

Lab: Email Notifications Job Instructions

Steps to Follow:

1. Navigate to Jenkins home page;
2. Click your any job created in the Labs done earlier.
3. Click **Configure** from Left Panel
4. Scroll down, Under **Post-build Actions** section
5. Click Add post-build action
6. Select **Editable Email Notification**

It should add **Editable Email Notification** section

7. In **Project Recipients List** field, add comma and <email id where you want to send notification>
8. Click **Save**
9. Build the job again;
10. Click on the new triggered build number under Build History in left panel
11. Click **Console Output**
12. View the log

It should display the information about the email id where the notification is sent *and Finished: SUCCESS*

13. Open your email account;

An email should be present in your inbox.
